Education

R V Institute of Technology and Management

Bachelor of Engineering in Computer Science and Engineering

- CGPA: 8.12

Expected 2027

Bengaluru, Karnataka

St. John's Science P U College

Pre-University Education (PUC) in Science

- Percentage: 90.67%

2023

Davangere, Karnataka

Gurudeva English Medium High School

Karnataka School Examination and Assessment Board

- Percentage: 96.8%

2021

Kotturu, Karnataka

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Object-Oriented Programming
- Operating Systems
- Computer Networks
- Machine Learning

Projects

Fintech Payment Gateway System | *Node.js, Express.js, MongoDB Atlas, JWT, REST APIs*

2026

- Developed a secure payment gateway backend with wallet management, transaction tracking, refunds, and fraud detection.
- Built idempotent payment APIs to prevent duplicate transactions and maintain consistency during payment processing.
- Implemented JWT authentication and RESTful APIs for secure user and transaction operations.
- Implemented rate limiting and high-frequency transaction monitoring as basic fraud detection mechanisms.

Lunara – PCOS Screening App | *React Native, Expo, Node.js, Express.js, MongoDB, Python, XGBoost*

2026

- Developed a mobile application integrating machine learning and REST APIs for PCOS screening and personalized recommendations.
- Implemented PCOS screening using an XGBoost-based machine learning model.
- Integrated RESTful APIs for processing user inputs and generating screening results and personalized recommendations.

SmartEdu – Learning Platform | *React.js, Node.js, Express.js, MongoDB, Python, Scikit-Learn*

2025

- Developed a full-stack MERN learning platform integrating machine learning for personalized learning and student performance analysis.
- Implemented student performance prediction and weak-subject analysis using a trained Logistic Regression model.
- Integrated API-based quiz generation and designed RESTful APIs with a responsive React interface.

Blogify – Full Stack Blogging Platform | *React.js, Node.js, Express.js, MongoDB, JWT*

2025

- Developed a MERN stack blogging platform with secure authentication and RESTful APIs for dynamic blog management.
- Implemented login and signup with JWT-based authentication, protected routes, and token-based authorization.
- Designed RESTful APIs supporting CRUD operations for blog posts and user data.

Technical Skills

Languages: Python, C, Java, JavaScript, SQL

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, PyCharm, Postman, Hoppscotch, Render, Vercel

Machine Learning: Python, Scikit-Learn

Achievements

Research Publication: Published a research paper on “Multi-Modal Deep Learning for Pneumonia Detection” in IRJET.

Cisco Networking Academy: Successfully completed the “Networking Basics” certification course.

Operating Systems Certification: Successfully completed a certification course in Operating Systems concepts.

Python Certification: Earned a certification demonstrating proficiency in Python programming.
